**A REVOLUTIONARY
NEW PATENTED
CONCEPT FOR
HOSE END
SPRAYERS**

K-10

We are pleased to present the new, patented series of wide-mouth sprayers.

The product line consists of three distinct models, all powerful venturi systems. They have many of the same mechanical features in common. These exciting features are explained on the opposite page. As can be seen by the handsome but simple product dials shown below, each model performs its own distinctive function. These functions are detailed in the following pages. Green Gardens Hose End Sprayer is state of the art, patented, and will be an exciting plus to your retail presentation. Whichever one you choose, you can be certain it has capabilities and features not found on other wide-mouth sprayers.

Our product name flows *from* our patented, sliding, product selection mechanism. When in the "OFF" position, the sprayer and bottle are leak proof. All units fit on a sturdy 83 mm wide-mouth bottle. This container has ample clearance for pouring liquid or granules. Once product is introduced to the bottle, product ratio selection is made by a simple dial system which is on top of the sprayer. Every model has multiple choices for product ratio and spray pattern. The lowest total combination of settings and spray patterns is 12. The highest is 36! The easy-to-use product dial and rotating spray head patterns let you spray what you want in anyone of three popular spray patterns. All models are designed to be ergonomically correct, user friendly; functional, easy to use and understandable.

Green Garden has been in business for over 40 years and is the leader in hose end sprayer aspiration systems. The company designed the first 28 mm sprayer and provides sprayers to the leading consumer product companies of America. Chances are, our sprayers are currently on your retail shelves! Experience equates to confidence--your confidence for a quality product.

Model K-10

Model K-11

Model K-12

K-10 COMBINATION™ LIQUID AND CLOG-FREE SPRAYER

THE WORLD'S FIRST
COMBINATION™
LIQUID AND CLOG-FREE™
SPRAYER!

**IF IT CAN
BE SPRAYED,
THE K-10
COMBINATION™
CAN SPRAY IT!**

DRY SETTING

Operates exactly like all present Clog-Free™ feeders

WET SETTINGS

Offers four separate pre-fixed quantity selections: 3 gallon, 6 gallon, 15 gallon, 21 gallon

K-11 Clog-Free™ Feeder

The Model K-II is the world's only four-setting feeder that allows you to properly merchandise and sell fish emulsion, liquid lime and other coarse products. With four separate settings, the K-II can be used for: 1) Lawn and garden food; 2) Acid-loving plant food; 3) Rose food; 4) Fish emulsion, liquid lime, liquid iron and other liquids too thick to go through a venturi sprayer. With three separate spray patterns, the K-II is leak proof when in the "OFF" setting. Lifetime warranty and product service.

K-12 Liquid Spreader™

With Model K-12's twelve separate liquid settings, you just pour in the product, select the proper setting and spray. Finally; a product-neutral sprayer for all your lines! Or, the K-12 can be designed to fit your house brand selections. Its three-position rotating spray head is permanent. It is leak proof when in the "OFF" setting and features one setting as a 6-gallon sprayer mix for fixed quantity or odd mixtures.

Features:

Big, easy-to-grip product selection knob. In the "OFF" position, the jar is sealed and leakproof.

Rotating spray head with three separate positions.

Gallonage marks provided on label for quantity desired.

Easy water ON/OFF thumb switch.

Convenient hose-end swivel coupler.

Built-in back flow prevention device keeps product in jar from entering home water system.

Ergonomic, insulated comfort grip handle with venting fins.

Easy-to-fill 83 mm wide-mouth bottle with wide, sturdy base. Hold up to two and a half pounds, or over one quart.

Gentle shower for flowers, delicate shrubs, and roses.

Bullet spray for trees, high places, and tough rinse jobs.

Flat spray for lawns and large areas.
